Our Vision

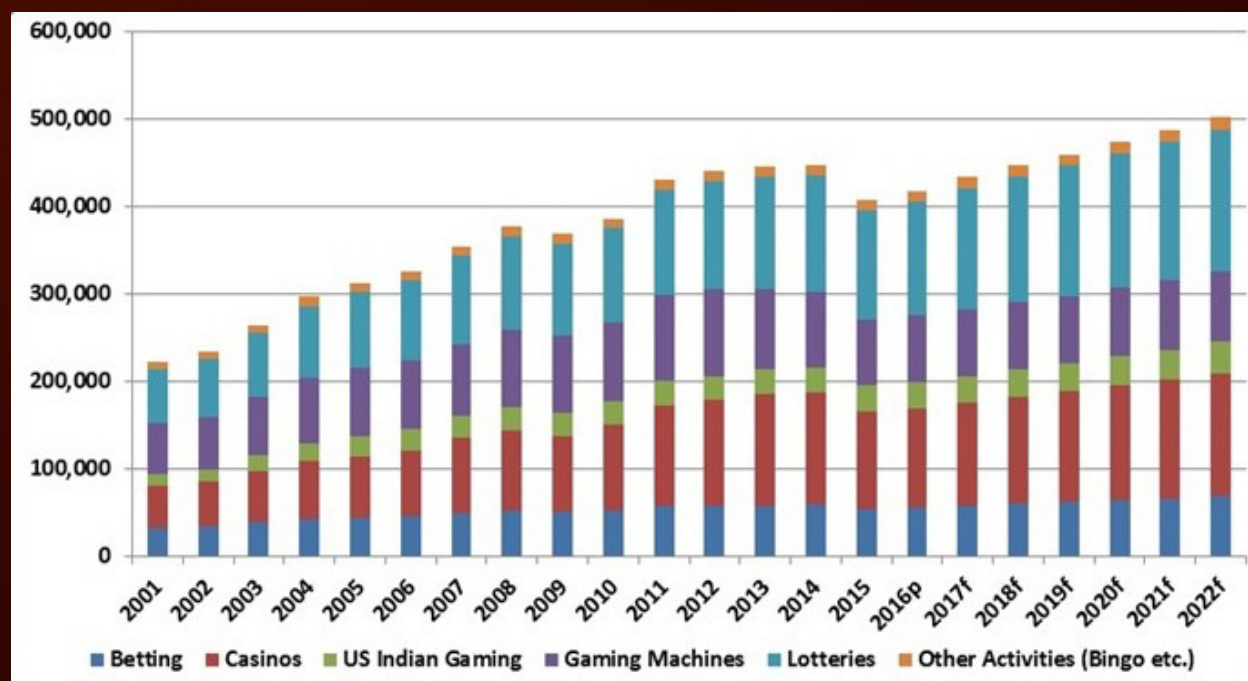

The global amusements market, of which the gambling market is a segment, reached a value of nearly \$511.3 billion in 2018, having grown at a CAGR of 4.5% since 2014. It will expected to grow at a CAGR of 6.3% to nearly \$652.6 billion by 2022.

Global Gambling Market Share

Our vision is so simple, now that we know everything there is to know about this new crypto casino trend, but the chances of winning and the costs involved are taking a toll for players due to little competition in a saturated market. Casino platforms make most of their revenues through high entry fees, high rake fees and high withdrawal fees. In addition, they also reduce players chances of winning as they compete against computers that are programmed to perform the betting tasks more efficiently than humans do. Overall, Super8 Coin has realized a gap in the Casino market and have capitalized on this through the application of a blockchain technology that is far more reasonable to the players and the Casino community.

It had advantages on payments and withdrawals, taking into account fees and the speed of the transactions and increased privacy of our players.
